

MoonKitties

A journey to the moon!

Mission Paper

Who are the MoonKitties?

Planet Meow was one of a kind in the history of planets. Its kittens led an ordinary life until one day when one of them discovered a map which pointed them towards **untold riches** on a moon far away. In order to reach the treasures, a group of kittens called **Moonkitties** was formed who started on an expedition to go to the moon. They built a spaceship that ran on no ordinary fuel but the very special **\$MEOW**.

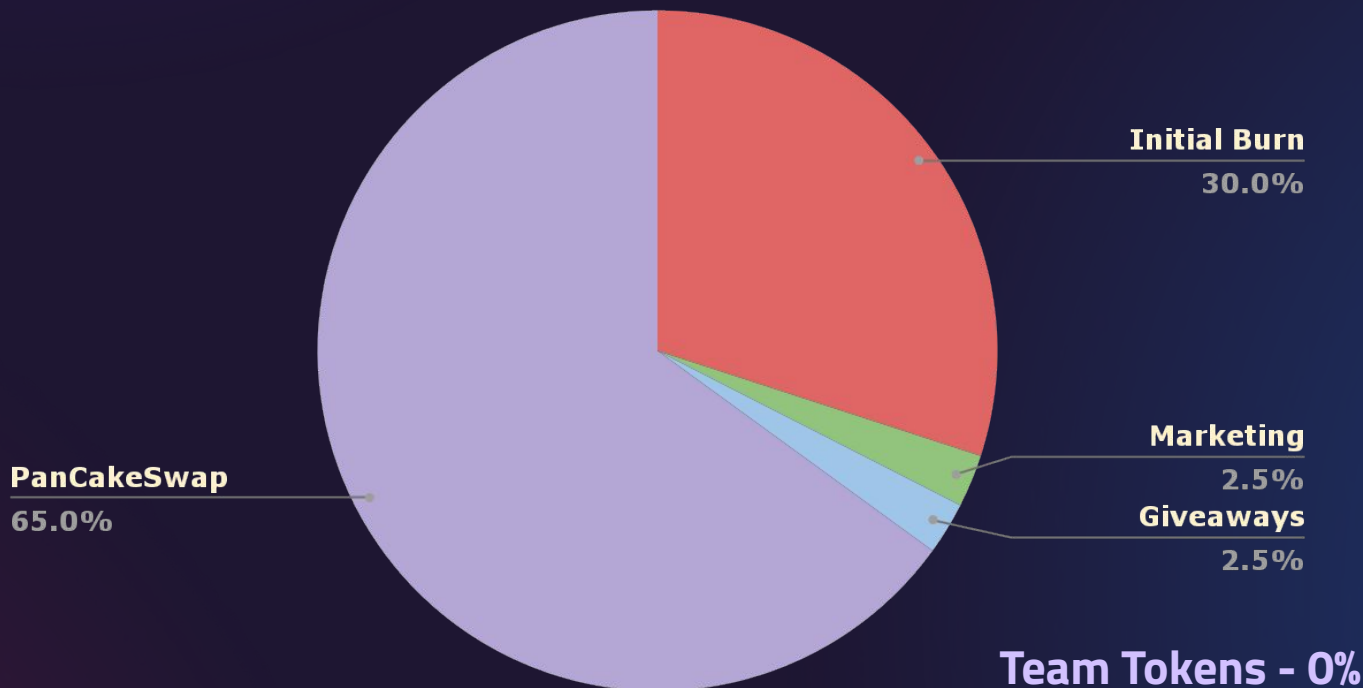

Join this dashing adventure with the MoonKitties by buying \$MEOW right now and fuel your way to the moon to grab the biggest treasures awaiting you!

Fine, but what exactly is **\$MEOW?**

\$MEOW is a decentralized community token with automatic rewards for all holders. The holders will get 5% of each transaction automatically but simply holding \$MEOW in their wallets. It has been created on the Binance Smart Chain to ensure less gas fees for each transaction.

Tokenomics

Total Supply - 1,000,000,000,000,000 \$MEOW

Safety for Token Holders

Renounce Ownership

Ownership will be renounced after the launch, which means that the smart contract can't be adjusted by the owner.

Lock Liquidity

The liquidity will be locked after the fair launch.

Anti-whale Measures

There is a limit of 0.5% for each transaction. It means that any person can only buy/sell a maximum of 5000000000000 MEOW in a single transaction.

This means that there is no chance of a Rug Pull happening. Moonkitties will belong to the community and will be driven by the community.

Buy on PanCakeSwap
